Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

Claims 1-35 (canceled).

36. (Previously Presented) A material comprising the reaction product of an A-side

comprising an isocyanate and a B-side comprising an esterified polyol and a catalyst, wherein

the esterified polyol comprises the reaction product of a first polyol, and a blown vegetable oil

and the first polyol comprises the reaction product of a multifunctional alcohol and a second

multifunctional compound.

37. (Previously Presented) The material of claim 36, wherein the second

multifunctional compound comprises a saccharide compound.

38. (Canceled)

39. (Canceled)

40. (Previously Presented) The material of claim 36, wherein the blown vegetable oil

comprises a blown vegetable oil chosen from blown palm oil, blown safflower oil, blown

canola oil, blown soy oil, blown cottonseed oil, and blown rapeseed oil.

41. (Previously Presented) The material of claim 40, wherein the saccharide

compound comprises a saccharide compound chosen from monosaccharides, disaccharides,

oligosaccharides, sugar alcohols, and honey.

42. (Previously Presented) The material of claim 37, wherein the saccharide compound comprises glucose.

43. (Previously Presented) The material of claim 37, wherein the saccharide compound comprises sorbitol.

44. (Previously Presented) The material of claim 37, wherein the saccharide compound comprises cane sugar.

45. (Previously Presented) The material of claim 36, wherein the multifunctional alcohol comprises a multifunctional alcohol chosen from glycerin, butanediol, ethylene glycol, tripropylene glycol, dipropylene glycol, and aliphatic amine tetrol.

46. (Previously Presented) The material of claim 36, wherein the B-side further comprises a crosslinker.

Ł

47. (Previously Presented) The material of claim 46, wherein the crosslinker comprises a crosslinker chosen from glycerin, ethylene glycol, butanediol, dipropylene glycol, tripropylene glycol, and aliphatic amine tetrol.

48. (Previously Presented) The material of claim 36, wherein the B-side further comprises a blowing agent.

49. (Previously Presented) The material of claim 48, wherein the blowing agent comprises a blowing agent chosen from water, acetone, methyl isobutyl ketone, methylene chloride, a hydrochloroflurocarbon, and a hydroflurocarbon.

50. (Previously Presented) The material of claim 36, wherein the isocyanate

comprises a diisocyanate compound.

51. (Previously Presented) The material of claim 36, wherein the isocyanate

comprises an isocyanate chosen from 2,4' toluene diisocyanate, 4,4' diphenylmethane

diisocyanate, and 2,4 diphenylmethane diisocyanate.

52. (Previously Presented) The material of claim 36, wherein the isocyanate

comprises a prepolymer comprising the reaction product of a vegetable oil and an isocyanate.

53. (Previously Presented) The material of claim 36, wherein the B-side further

comprises a petroleum based polyol.

54. (Previously Presented) The material of claim 53, wherein the petroleum based

polyol comprises a petroleum based polyol chosen from polyether polyol, polyester polyol, and

polyurea polyol.

55. (Previously Presented) A material comprising the reaction product of a blown

vegetable oil and the reaction product of a first multifunctional alcohol and a second

multifunctional compound.

56. (Previously Presented) The material of claim 55, wherein the second

multifunctional compound comprises a saccharide compound.

57. (Previously Presented) The material of claim 55, wherein the vegetable oil is

blown.

58. (Previously Presented) The material of claim 55, wherein the vegetable oil

comprises a vegetable oil chosen from palm oil, safflower oil, canola oil, soy oil, cottonseed

oil, and rapeseed oil.

59. (Previously Presented) The material of claim 55, wherein the vegetable oil

comprises a blown vegetable oil chosen from blown palm oil, blown safflower oil, blown

canola oil, blown soy oil, blown cottonseed oil, and blown rapeseed oil.

60. (Previously Presented) The material of claim 56, wherein the saccharide

compound comprises a saccharide chosen from monosaccharides, disaccharides,

oligosaccharides, sugar alcohols, and honey.

61. (Previously Presented) The material of claim 56, wherein the saccharide

compound comprises cane sugar.

62. (Previously Presented) The material of claim 55, wherein the first multifunctional

alcohol comprises a multifunctional alcohol chosen from glycerin, butanediol, ethylene glycol,

tripropylene glycol, dipropylene glycol, and aliphatic amine tetrol.

Claims 63-75 (canceled).

76. (Previously Presented) A material comprising: the reaction product of:

an isocyanate; and

the reaction product of a first polyol and a blown vegetable oil, wherein the first

polyol is the reaction product of a multifunctional alcohol and a second multifunctional

: 6

compound; and a catalyst.

77. (Previously Presented) The material of claim 76, wherein the isocyanate is a diisocyanate compound.

78. (Previously Presented) The material of claim 76, wherein the isocyanate comprises an isocyanate chosen from 2,4' toluene diisocyanate, 4,4' diphenylmethane diisocyanate, and 2,4' diphenylmethane diisocyanate.

79. (Previously Presented) The material of claim 76, wherein the isocyanate comprises a prepolymer comprising the reaction product of a vegetable oil and an isocyanate.

80. (Previously Presented) The material of claim 76, wherein the isocyanate comprises an isocyanate and a blowing agent.

81. (Previously Presented) The material of claim 80, wherein the isocyanate further comprises a crosslinker.

82. (Currently Amended) A material comprising the reaction product of:

an isocyanate; and

the reaction product of a first polyol and a modified crude vegetable oil and a catalyst, wherein the first polyol is the reaction product of a multifunctional alcohol and a second multifunctional compound,

wherein the modified crude vegetable oil is a blown modified crude vegetable oil comprising the reaction product of a crude vegetable oil and a second polyol that comprises

Applicant: Thomas M. Kurth et al.
